Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: Upon further consideration with applicant's arguments, examiner agrees with the applicant's counsel that the prior art of record of Muraoka et al. in view of Zoche et al. fails to disclose the claimed invention such as a process for making thin plate magnetic plates with low hysteresis and stacking the thin plate magnetic plates alternatively with insulating film follow by applying pressure and/or heat to the stack to making a composite high frequency magnetic material. Muraoka et al. teach a process of making a magnetic element including processes of making magnetic plates and making thin insulating films and depositing an adhesive on both sides of the insulating films and making a stack by alternating layers of magnetic plates and insulating films and applying pressure and heat to the stack. However, Muraoka et al. do not teach a process of making thin plate

magnetic plates with low hysteresis. It is not obvious taken alone or in combination of other references fairly to suggest the claimed invention.
